

**Alternative for the Foreign Language Requirement for the B.S. in Biological Sciences  
Effective FS2018**

Students may select 12 hours of courses numbered 2000 or above from **one** of the following two tracks as an alternative for the Foreign Language requirement.  
**You may not pick and choose among the tracks – your alternative for Foreign Language must consist of courses from the same track.**  
**Courses used from this list to meet the Foreign Language Requirement may NOT be used to satisfy major, minor, general education requirements or certificate requirements of another program.**

All of the courses on this list have been offered on a more-or-less regular basis for the past 5 years; however, the Division of Biological Sciences makes no representation that they will continue to do so. Some courses may be restricted to majors during the early registration period. Students should confer with the appropriate departments when questions arise about the offering of particular courses on this list or the availability of spaces for non-majors.
